

Ishwor Gupta

Computer Engineering Student • Class Representative (CR) • Aspiring Software Developer

Passionate about programming, web development, software development, and technology-driven solutions. Dedicated to continuous learning, leadership, and creating educational resources that support engineering students and communities.

About Me

Hello! I'm **Ishwor Gupta**, a Bachelor of Computer Engineering student at Mega College of Engineering. I currently serve as the **Class Representative (CR)**, where I actively contribute to student leadership, communication, and academic coordination.

I am passionate about technology, programming, and continuous learning. My technical skills include **HTML, Python, C, and C++**, and I enjoy building websites, solving programming problems, and exploring new technologies. I am particularly interested in web development, software development, and creating digital solutions that help students and communities.

Beyond academics, I manage and support several student-focused platforms, including the **PU Computer Engineering Notes** website and engineering student social media communities. These experiences have strengthened my leadership, teamwork, project management, and communication skills.

My goal is to continuously improve my technical expertise, contribute to meaningful projects, and grow as a professional engineer while making a positive impact through technology and innovation.
